

Why LessDrops®?

Combination Drop Therapy is a way to significantly reduce the number of eye drops needed after ocular surgeries. This approach alleviates the need for multiple postoperative drops and, in turn, helps cut medication costs. Developed with your patients top-of-mind, our proprietary topical compounded formulations aim to improve patient compliance and alleviate patient confusion with fewer drops, meaning they will be better able to follow the regimen you prescribe.

COMMONLY REPORTED PATIENT COMPLIANCE ISSUES AFTER OCULAR SURGERY^{1,2}

- Daily dose frequency
- Using an incorrect amount of drops
- Instillation technique
- Forgetfulness
- Inconvenience
- Unaffordability

ABOUT SSP TECHNOLOGY®

Proprietary ophthalmic compounded formulations from Imprimis Pharmaceuticals are enabled by our patent-pending SSP Technology, which allows active pharmaceutical ingredients (APIs) that ordinarily do not mix to solubilize into a predictable, well-distributed, micronized particle suspension.

Our drug formulations with SSP Technology are optimized for isotonicity and pH compatibility for ophthalmic use. The result is a variety of new sterile combination drug formulations, either as injectable or topical therapies compounded to meet your patients' specific needs.

Without our SSP Technology, large irregular un-usable clumps of active drugs persist.

Our SSP Technology allows active drugs to mix and become usable as an injection or as a combination eye drop.

Compounding with an Imprimis Pharmacy

imprimis ^{Rx}

At Imprimis Pharmaceuticals, we are committed to delivering high quality formulations that meet or exceed stringent U.S. Pharmacopeia (USP) guidelines.

The formulations have been optimized for the isotonicity and pH most compatible with the eye. Additionally, every batch is tested for sterility prior to distribution. Complimentary copies of the cleared testing reports are included with each order of our proprietary formulations.

Pharmacy Compounding Accreditation Board (PCAB)-Accredited

DYNALABS Continuous Quality Improvement (COI) Center of Excellence

We can provide many other compounded medications to meet your patients' needs.
